

# Your RE/MAX Green Specialist is working for *you*.

*A*s a RE/MAX Green Specialist, your agent is an eco-friendly real estate expert who can guide you through the home buying or selling process. As an eco-conscious consumer, you realize that green homes can be both good for the pocketbook as well as for the environment.

Your RE/MAX Green Specialist has taken the extra step of earning an industry recognized green designation approved by RE/MAX International. It means that your agent knows the basics – and then some – about green building and materials, energy efficiency, cost savings, carbon footprint, and effective marketing methods for these unique properties.

If you're a home seller, your RE/MAX Green agent can help you add green features to your property to make it more attractive to eco-conscious buyers. Your agent also has specific training to market an existing green property, helping you achieve your goals quickly and without worries.

Homebuyers: you can rest assured that your RE/MAX Green Specialist knows which green features can help you save money, safeguard your health and lessen your carbon footprint.

Being green is not just the *right* thing to do.  
It's the *smart* thing to do.
